Gentlemen:

We have been a customer of Arizona Digital since January 2003. Over the past years we have had three different copiers through Arizona Digital, and have been satisfied with the equipment they recommended. Our latest model made by Lexmark is the easiest to use and the most reliable.

In addition to running lots of copies we also use the copier as a printer and scanner. The scanning feature is very easy to use and we direct the scans to whoever we wish to send them to. We appreciate that you took the time to train us and program the equipment to our specifications. The fact that the copier is smaller and faster than previous models is also a great feature.

We would recommend Arizona Digital as a great company to use as they are knowledgeable and helpful both before and after you purchase from them.

Sincerely,

A handwritten signature in black ink, appearing to read "Sue Johnson", written in a cursive style.
