Dear Matt,

I just wanted to thank you for all the work that you along with your service and IT department did to help us get our new Xerox machine up and running. It was the best customer service that our company has ever received from a copy machine service company.

The machine that you recommended for our company is working out great and it is very user friendly.

Thank you again for all of your help and patience with getting our new machine.

Sincerely,

  
Jennifer Back
